Notice of Allowability	09/752,254	ROESNER ET AL.	
	Examiner	Art Unit	
	William D. Thomson	2123.	
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. X This communication is responsive to <u>04 February 2005 and 07 September 2004</u> .			
2. X The allowed claim(s) is/are <u>1-3,5,6 and 10-16</u> .			
3. 🔀 The drawings filed on <u>21 March 2001</u> are accepted by the Examiner.			
4.			
Attachment(s) 1. Notice of References Cited (PTO-892) 2. Notice of Draftperson's Patent Drawing Review (PTO-948) 3. Information Disclosure Statements (PTO-1449 or PTO/SB/Paper No./Mail Date 4. Examiner's Comment Regarding Requirement for Deposit of Biological Material	Paper No./Mail Da /08), 7.	r (PTO-413), ate ment/Comment	

Art Unit: 2123

DETAILED ACTION and ALLOWANCE

1. Claims 1-3, 5,6, 10-16 have been examined and allowed.

Drawings

2. Formal drawings filed on March 21, 2001, which included replacement sheets for drawings that where originally hand drawn are acceptable for printing.

Reasons for Allowance

- 3. The following is an examiner's statement of reasons for allowance:
- 4. Applicant's request for reconsideration of February 4, 2005 with arguments and clarification regarding language of the claims has overcome the prior Examiner's rejections under 35 U.S.C. 112 2nd paragraph. Therefore the rejection(s) has been overcome and withdrawn.
- 5. In the Advisory action of March 4, 2005, the prior Examiner withdrew the rejections regarding 101, the reasoning behind removing the rejection is based upon the determination that a data structure stored on a computer readable medium for use in a computer-aided design and verification system is statutory subject mater as would be a data structure stored on a computer readable medium, when executed on a computer is statutory subject matter. The computer-aided design and verification system is clearly a computer system. Further, the claims are directed to single statutory classes of invention and therefore the citation of In re Lyell is not germane to the Applicant's claims.

Art Unit: 2123

There are no prior art rejections standing or asserted against any of the claims in 6. the instant case, giving deference to the prior Examiner's examination, including an updated search of the prior art prior art of record did not uncover a single teaching that expressly taught or render obvious the claimed invention in its entirety as recited in claims 1, 6 and 13. "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." Verdegaal Bros. v. Union Oil Co. of California, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987). "The identical invention must be shown in as complete detail as is contained in the ... claim." Richardson v. Suzuki Motor Co., 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an ipsissimis verbis test, i.e., identity of terminology is not required. In re Bond, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990). Though, pre-compiling, post-compiling and intermediate compiling, port mapping, instantiation and the use of multiple instrumentations in the context of HDL for design an verification systems are well known, the specific operations or steps as recited in claims 1, 6, and 13 were not uncovered that would clearly anticipate each independent claim, as the invention is recited in its entirety within each claim. Motivation to combine the teachings of the prior art of record, including that which would have been known to one with an ordinary level of skill in this art, was not uncovered so as to render the claimed invention obvious.

Dependent claims are allowable as they depend on the allowed independent claims.

Art Unit: 2123

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William D. Thomson whose telephone number is 571-272-3718. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Teska can be reached on 571-272-3716.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
